Apertus v1.5 70B, through BASE_URL
Case: a claim, its vote and a booklet PDF
a booklet covers one to five votes
once per booklet
1
Read the booklet
its PDF tags: headings, paragraphs, reading order
2
Index its sentences
for BM25, each with its page and headings
3
Narrow to the claim's vote
its pages, from the running headers
4
Search
with the claim, or with its translation
5
Build the excerpts
the 8 best sentences and their neighbours, numbered, with page and section: about 2,000 characters
6
Decide
on the excerpts, the claim and its translation
7
Return the evidence
5 verbatim sentences with their pages, those of the cited excerpts first
Prediction: the label and the evidence
the last Label: line; the sentences of step 7
Translate
only if the claim is in another language than the booklet
Reason, then label
at most three sentences, then
Label: <word> and
Excerpts: <numbers>
